

New Links Between Different Systems – Artist talk with Philip Kanwischer on November 18, 2021, 19:00 CET

How can analogue photography and innovative research in quantum physics fit together? A groundbreaking collaboration in science communication between the international artist collective Kalamari Klub and the Collaborative Research Centre IsoQuant at the University of Heidelberg seeks to find commonalities between these seemingly disparate fields. The artist Philip Kanwischer was invited for the newly established *SciArt Residency* programme, which started in October 2021 and aims to initiate curiosity-driven engagement between artists, scientists and other members of the society, promoting a spirit of co-learning and equality while helping to communicate knowledge through cross-disciplinary collaboration. The Artist talk *New Links Between Different Systems* on November 18, 2021, 19:00 at Café Leitstelle serves as a midway point through Kanwischer's residency and will include an introduction to the *SciArt* programme, a talk and a discussion between the artist and collaborating scientists from IsoQuant. The event is open to everyone, will be streamed online and held in English. Registration is free of charge via info@kalamariklub.org.

Philip Kanwischer, born 1991 in Bamberg, Germany, studied photography at the Academy of Fine Arts in Leipzig, Germany and at the Accademia di Belle Arti in Napoli, Italy. In his work he combines images and text into narrative installations, studying the perception of catastrophic events and the tense relation between human and nature. His works have been included in numerous solo and group shows. He lives and works in Leipzig, Germany. More than 170 artists from 41 countries answered the Open Call for the *SciArt Residency*. In a multi-level application process, Philip Kanwischer convinced the jury consisting of experts from physics, arts, and science communication.

Event info:

New Links Between Different Systems – Artist talk and discussion with Philip Kanwischer

**Thursday, Nov 18, 2021, 19:00 CET (doors 18:30 CET)
Café Leitstelle, Emil-Maier-Str. 16, Heidelberg & Live Stream**

No entrance fee. Registrations for Café Leitstelle and live stream: info@kalamariklub.org
Corona: 2G rules, proof of vaccination or former infection needed, masks mandatory

Philip Kanwischer

Artist Talk

Café Leitstelle – Emil-Maier-Str. 16 – Heidelberg

Donnerstag, 18. November 2021 – 19:00 Uhr

new links between different systems

UNIVERSITÄT
HEIDELBERG
ZUKUNFT
SEIT 1386

About the institutions:

Kalamari Klub is an international artist collective for the celebration of analogue photography. The collective runs a community darkroom in Heidelberg and has been promoting and supporting local and international artists through exhibitions, workshops, publications and residency programmes since 2016.

IsoQuant is a Collaborative Research Centre (CRC) at the University of Heidelberg focusing on *Isolated Quantum Systems and Universality in Extreme Conditions*. Collaborative Research Centres are long-term research institutions in which researchers are tackling innovative, challenging and complex research questions within a cross-disciplinary research program. The scientific aim of the CRC IsoQuant is to explore and gain better understanding of the question why many physical quantum systems exhibit characteristic common properties despite fundamental differences in key parameters such as temperature, density, or field strength. The cross-disciplinary approach to this research question within the IsoQuant collaboration brings together theoretical and experimental physicists from different fields and allows for a broad bandwidth of experimental and theoretical methods to solve overarching issues in physics.
